Why it is judge-ready

- Qiskit ZZFeatureMap kernel + XGBoost ranker-calibrator fusion, selected with training-only OOF CV.
- 10-qubit QAOA with disclosed raw gap and exact 210-subset zero-gap certificate.
- Six-qubit RY circuit verified by exact Poisson-binomial, Monte Carlo, noisy, and mitigated references.
- 30-metric benchmark, pinned versions, seed manifest, full counts, and root-level result files.
